

RIC 2011 Public Seismic Information Workshop

Christina Denissen
NRC/Region IV
March 8, 2011

1

Purpose of Workshop

- High level of interest among the public regarding seismic issues at Diablo Canyon
- Many technical presentations over the years, recently with the Shoreline fault zone
- Background for future public workshops with the SSHAC Level 3 (Senior Seismic Hazards Analysis Committee Level 3 study)

2

Day 1: General Seismic Information

- Speakers:

- Topics: Basics of Strong Motion Seismology, Seismic Source Characterization, Probabilistic Seismic Hazard Assessment, and Nuclear Power Plants and Seismic Hazard

3

Day 2: Diablo Canyon Power Plant

• Speakers:

- Topics: Diablo Canyon Seismic Review History, Tsunami Hazards Evaluation, and Progress of Current Seismic Studies at Diablo Canyon

4

Videos from the Workshop

➤ www.nrc.gov

- Public Meetings and Involvement
- Conferences and Symposia
- Seismic Information Workshop
- Day One/Two (Video)

5

Feedback from Attendees

- Approximately 140 attendees
- 35 out of 40 feedback forms answered positively
- The majority of feedback forms reflected gratitude for the efforts of the NRC and the quality of the presentations. The majority also indicated there was a great deal of knowledge gained, and a recognition of the professionalism and expertise of the panelists.
