

RIC 2013

Overview and Status of TSTF-523

Matthew Hamm
Office of Nuclear Reactor Regulation
March 12, 2013

1

Overview of TSTF-523, Revision 2

TSTF-523 Contains:

- 1) Proposed changes to Standard Technical Specification Surveillance Requirements and Bases to address gas accumulation issues.
- 2) A Model License Amendment Request for licensee's proposing adoption of TSTF-523 changes for their plant-specific Technical Specifications.

2

Status of TSTF-523, Revision 2

- TSTF-523 has been reviewed by NRC Staff.
- A Model Safety Evaluation will be placed in the Federal Register for Public Comment in March 2013.
- Following satisfactory resolution of any public comments, the Technical Specification changes will be made available for adoption by licensees (via a license amendment) by publishing a Notice of Availability in the Federal Register.
