## Support of Construction Inspections

Howard Mahan  
Site Licensing Manager  
Vogtle 3&4

RIC - March 12, 2013

---

---

---

---

---

---

---

---

## Site Inspection Support

- Safety, Quality and Compliance
- Perform pre-inspection activities
- Ensure the NRC Inspectors have the information they need to do their jobs
- Provide information prior to inspection
- Support information request during inspection ASAP

SOUTHERN COMPANY Westinghouse CBI

---

---

---

---

---

---

---

---

## Site Inspection Support

- Use Three-Part communication to make sure that you understand the inspector's question
- Too much time can be lost refining your response

---

---

---

---

---

---

---

---

## Site Inspection Support

- As the Licensee you must be Open and Transparent with the Inspectors
- Place known issues into your Corrective Action Program (CAP) early, before the inspection if possible

---

---

---

---

---

---

---

---

## Site Inspection Support

- When issues are identified, start the process to determine the significance of the issue
- Discuss the significance with the inspectors to help get the issues correctly classified in the SDP

---

---

---

---

---

---

---

---

## Site Inspection Support

- Have a Questioning Attitude when looking at how you are implementing the Design and Licensing Basis
- Be ahead of the game, ask the hard questions early and use CAP
- Communicate with your peers often

---

---

---

---

---

---
