

DTE Energy®

**Fermi 3
Combined License Mandatory Hearing
Environmental Overview – Panel 1**

Fermi 3 Environmental Review Led to Project Improvements

- Interacted with regional stakeholders prior to COLA
 - Explained project and licensing process
 - Contacted local tribes to seek input on cultural resources
 - Strong state and local support for project for Fermi 3
- Followed NRC guidance for Fermi 3 Environmental Report (NUREG-1555, ISGs)
 - Used available information on Fermi site (historic information from Fermi 1 and 2 construction and operation)
 - Accounted for existing site infrastructure/access (not a greenfield)
 - Overall, ER is a comprehensive assessment of the impacts of building Fermi 3
- Stakeholder involvement during COLA preparation and review resulted in project improvements
 - Made significant revisions to site layout to minimize wetland impacts
 - Reduced impacts to undeveloped areas of site (e.g., parking garage, barge slip)
 - Corollary benefit: better site layout for construction activities
